

Love In Codes

Contributed by Administrator
Monday, 11 June 2007

Women can never be told enough that they are loved and they are special. An inexpensive way of doing so is by sending a card or note. An inexpensive and clever way of doing so is by sending a coded card or note.

It is easy to come up with codes. You can use the standard 1=A, 2=B, 3=C, etc. or you can come up with a completely different code using letters, numbers or symbols of your own creation. If the code is simple enough, you may want to let her try to solve it on her own or for a complicated code, you might want to send the key to the code at a different time.

You can mail the coded message, fax it to her at work (her co-workers will be so envious) or place it in a book she is reading. You may want to cut out letters from magazines or newspapers to address the letter or fax so she won't recognize your handwriting. Watch out 007!
